Clans and Calamity: How Social Capital Saved Lives during China's Great Famine

Jiarui Cao, Yiqing Xu, and Chuanchuan Zhang

Journal of Development Economics
https://doi.org/10.1016/j.jdeveco.2022.102865

Notes:

1) The CFPS data we use in the article is a controlled version. To comply with the data releasing rules set by the CFPS team, we do not share the data files as a part of the replication files. We provide the code and resulting graphics, nevertheless.

2) The lack of the CFPS data will affect the replication of Figures 7a & 7b and Table 2 in the main text, as well as Figure A4 and Tables A2-A3, A5-A6 in the appendix. Researchers who intend to replicate these results should apply for the CFPS data (2010, baseline survey) from the official CFPS website: http://www.isss.pku.edu.cn/cfps/en/index.htm.

3) A list of do files and their functionalities are provided below. For example, you can reproduce Figure 2a by running Figure2.do which uses "gbooks_byyear.dta". In the paper, the figures are produced using R. We reproduce the results using Stata to facilitate replication in the economics profession.

4) Figures 1 and 3 are produced by ArcGIS.

5) Please contact Dr. Chuanchuan Zhang (zhangchuanchuan@zju.edu.cn) if you have any questions.

Do file	Stata Data File	Output
Figure2.do	gbooks_byyear.dta	Figure 2a
Figure2.do	clan_distr.dta	Figure 2b
Figure4.do	clan_persistence.dta	Figures 4a & 4b
Figure5.do	mortality_sample.dta	Figures 5a & 5b
Figure6.do	mortality_sample.dta	Figure 6
Figure7.do		Figures 7a & 7b
Figure8.do	mortality_sample.dta	Figure 8a
Figure8.do	procurement_trends.dta	Figure 8b
FigureA1.do	macro_mortality.dta	Figure A1
FigureA2.do	mortality_sample.dta	Figures A2a & A2b
FigureA3.do	mortality_zupu.dta	Figure A3
FigureA4.do		Figure A4
FigureA5.do	mortality_sample.dta	Figure A5
FigureA6.do	mortality_sample.dta	Figure A6
Tables_of_mortality_sample.do	mortality_sample.dta	Tables 1, 3, A1, A4, A7, A8
Tables_of_cfps_sample.do		Tables 2, A2-A3, A5-A6
